Non-GAAP Financial Measures

In this Presentation, the Company has used the term "Net Asset Value" or "NAV" (the "Non-GAAP Financial Measure"), which is a financial measure that is not defined by International Financial Reporting Standards ("IFRS") but is used by management to evaluate the performance of the Company and its business. The Non-GAAP Financial Measure may also be used by investors, financial institutions and credit rating agencies to assess the Company's performance

and ability to service debt. The Non-GAAP Financial Measure does not have standardized meanings prescribed by generally accepted accounting principles (“GAAP”) and is therefore unlikely to be comparable to similar measures presented by other companies. The intent of the Non-GAAP Financial Measure is to provide additional useful information to investors and analysts; however, the measure does not have any standardized meaning under IFRS. The measure should not, therefore, be considered in isolation or used in substitute for measures of performance prepared in accordance with IFRS. Other issuers may calculate the Non-GAAP Financial Measure differently. The Company defines “Net Asset Value” as NAV is calculated based on market cap, last financing round, Angelist, comparables and represents the current of our portfolio of companies until July 21, 2021. Net Asset Value should not be construed as an alternative for making an investment or an investment decision. The Company believes the Net Asset Value is a meaningful metric for the reason of determining the value of portfolio investments.
